

Classic Cocktail Search

Software Design Document detailing Classic Cocktail Search web app.

User Requirements

As an avid classic cocktail fan I was looking for a way to search and get information on classic cocktails anywhere, anytime.

System Overview

This website/app will search from a list of classic cocktails and show information on the selected cocktail.

Functional Requirements

- Users can search for and get information on classic cocktails
- Responsive Progressive Web App. On all platforms, always online.

Functionality

- Javascript search function.
- PWA Validation.

Wireframes / Mockup

No Mock-ups created for this app.

Milestones

- ~~1. Javascript Search Function.~~
- ~~2. PWA Validation.~~
- ~~3. Site live at classiccocktail.org.~~
4. All Cocktail Information entered.

Prioritisation

MVP - Search and display all cocktails. PWA validation.

Road Map

Future implementations include Javascript Array for cocktails and push data to html. Cut down on HTML pages. After that a user login so cocktails can be added to a database.
